- The Supervisor : Dr. Ibrahim bin Abudallah Al Lahim.

- The Academic Year : 1425 – 1426 A.H

### \* **The subject of the research :**

Realizing the defined text from ( Al Kamel ) by comparing the written copies, finding the differences among them, and serving the text with commenting and explaining, then the detailed study for the tellers conditions, studying and graduating the underset Hadith with concentrating on clearing invalidness sides and paving for the realization by studying the author's method in the book.

### \* **The Importance of the Research:**

- The academic value of Al Kamel Book in order to the interest of the scientists with it, the diversing of Hadith Subjects, the distinct method of the author, the large number of underset Hadithes, author's comments on the Hadithes, collecting many texts about the conditions of the tellers, and considering it as an original resource for the following books.

- The book needs to the academic realization, where that it was published many editions containing clear shortage and many errors.

### \* **Research objects:**

- Revealing the academic value of the book and showing the position of the author among Hadith scientists.

- Finding the determined text of the book as the author wrote it. And serving the text ( studying, realizing, holding , graduating, explaining and comparing ).

- Identifying the method of Al Hafez Ibn Oadi in critiquing the tellers and the tales.

### \* **The Important topics:**

The research is divided to two sections :

- The first one is the studying and the second one is the realization.

The most important topics are as follow:

- Mentioning biography for the author.

- Strengthening the book , clearing its subject and its academic value.

- The author's resources in the realized section.

- The author's method in the book via the realized section , clearing his condition, his method in translations, and his method in critique and modification.

- realizing the book's name, and studying the written copies which are: the copy of Al zaheria bookstore, two copies from the Egyptian house for books, and a copy from the bookstore of the third Ahmed in Turkey.

- Realizing the defined text by comparing the written copies, finding the differences among them, and serving the text with commenting and explaining, then the detailed study for the tellers conditions, studying and graduating the underset Hadith with concentrating on clearing invalidness sides.

At the end of research, there is a mentioning for the most important results, and an appendix for the text with out any comments, then an detailed indexes.

**\* The most important results:**

- Clearing the independence of the author who is marked by mentioning a new results, none deduced them before him.

- There are many texts for critics where that the book ( Al Kamel ) possessed them alone.

- The agreement among the four written copies, which didn't differ except their quality level.

- Determining the points and positions which clear the mistakes of the written copies.

- The resemblance in the terms which are used by Ibn Oadi as ( denied – invalid – stranger – non memorized ).

- The variousness in Ibn Odai's methods for discovering disorder as considering the value of the teller in terms of his understanding, hearing. And from his methods, mentioning the tales which depend on specific adjectives even if it was imaginary to discover forming undersets and alleging some these tales.

- The critic isn't interested in the tale when it inclines to be wrong or it is wrong. Even if there is not opposition or differing for the others' opinions.

- Al Kamel book isn't one of the books which their basis is rightness, but the method of the tale in Al Kamel book is a clear proof on its invalidity.
